

# Lucas C P Colors

are unequalled; the natural pigments used are commercially pure, and the STRONGEST, FINEST AND CLEAREST IN TONE that are mined in this country; while the chemical colors used are our own manufacture and are guaranteed chemically pure. We challenge any manufacturer to make the same colors any brighter, any stronger, any finer, any purer, or more durable.

# Lucas Whites

## GUARANTEE PURE WHITE LEAD

Our own grinding. Old Dutch process, perfectly corroded, dry Hydrocarbonate of Lead, thoroughly mixed and finely ground in extra pale refined pure linseed oil. It is "short," fine and of very exceptional whiteness. Unequalled for interior flatting.

## GUARANTEE PURE LEAD AND ZINC

A combination of pure white lead and pure American zinc, ground fine in refined linseed oil. An excellent base for making tints for general outside work. Excellent working qualities and very durable.

## CAPITOL WHITE LEAD

A combination white composed of old Dutch process dry white lead, French process zinc and permanent white, intimately mixed and carefully ground in refined clarified pure linseed oil. It contains no metallic lead and no water. It will neither dust nor blacken like pure lead and is more durable. It is cheaper than pure lead and is non-poisonous. We guarantee it.

## V. M. SUPERIOR FRENCH ZINC

The ideal white zinc. A dazzling white of unequalled brilliancy. Non-poisonous. Ground with great care and exceedingly fine in specially refined, almost colorless, pure linseed oil.

## PURE AMERICAN ZINC

Exactly what we label it. The best domestic zinc white, ground fine in pure linseed oil. Particularly recommended for mixing with white lead for base or "stock" for general work.
